If I came by around nine tonight baby doubt would it be  
all right  
I've got it bad boy I must confess  
Tell you now honey would you mind if I took your hand  
in mine  
Could I hold you just say yes  
Come on it's on the tip of your tongue so easily done  
such a small request  
Oh babe you got something to say don't keep me  
waiting don't make me guess  
Oh do you love me just say yes

You don't have to go on and on cause you know what I  
really want  
And that's your love no more no less  
There's only one thing I need to hear when you whisper  
in my ear  
And that's one word just say yes  
Come on it's on the tip...  
Oh do you love me just say yes
