

Hillsong "More Than"

Visit "[More Than](#)" on MotoLyrics.com

Your eternal word formed the universe
And You speak to me whisper I'm your greatest love
You're the saving Lord, beauty in a storm
Everything I need more than I could ever want

You are my heart's desire
And I have fallen to the point of no return
More than my heart could know
More than in love with you

You're the saving Lord, beauty in a storm
Everything I need more than I could ever want

You are my heart's desire
And I have fallen to the point of no return
More than my heart could know
More than in love with you

You are my heart's desire
And I have fallen to the point of no return
More than my heart could know
More than in love with you, with you

You are my heart's desire
And I have fallen to the point of no return
More than my heart could know
More than in love with you
