"As sure as the sun rises in the east  
It also sets in the west"

"The sun is much more than a giant lightbulb  
There are other forces at work in the sun"

"The sun is a sphere of hot, seething gases  
and surges of radiation"

"The sun is so large  
it would take a hundred and nine Earths strung end to  
end  
to equal its diameter"

"How do you capture a piece of the sun?"

"Hilltop Hoods"

"And then the sun, we'll expect a connection to the sun"

[Pressure]

Well, 'Drinking from the Sun' is kinda like, it's a  
metaphor that you know  
We're, we're from a, we're from an underground  
culture  
that's kind of risen up into, into the limelight  
So we're sort of from, from down below drinking from  
what's coming above
