Let's fall apart together now

Zip and keep it in a body bag well-worn
Next to the mausoleum he was born in
Picking up the pieces of this gory glory of it all
From eve to mourn
For eve to mourn

Have no fear
There are wounds that are not meant to heal
And they sing, in venere veritas
Come inside
Let the bother you alive
And sing, baby sing
There are wounds that are not meant to heal at all
In venere veritas

Let's fall apart together now

There's a method to our sadness as we drag the mirror
ball and chain
Through the twilight again
Dressed up in shame
We are begging for a reflection
From an unshuttered heart
To blind and chase us
Over the edge

Have no fear
There are wounds that are not meant to heal
And they sing, in venere veritas
Come inside
Let the bother you alive
And sing, baby sing
There are wounds that are not meant to heal at all
In venere veritas

Have no fear
There are wounds that are not meant to heal
And they sing, in venere veritas
Come inside
Let the bother you alive

And sing, baby sing
There are wounds that are not meant to heal at all
In venere veritas
These are the wounds that are not meant to heal at all

Let's fall apart together now
Let's fall apart together now
