When I was born shadow comin' into your life...

The dark side of your sun... coming to

Every day sin is deeper in your heart

Screaming souls, deeper and deeper...

Come in me like a knife on my skin

But you can... never die... never die

Run away, take another falling love

Make my way, fire burning my desire

Every tear... you'll cry

Every day... I'll die

With my blood you can survive

And we live forever... into hell...

On my blood now you are free

Like a scream fly to me

Simil dreams and flying like an angel

But we fall always into hell... into hell

Run away, take another falling love

Make my way, fire burning my desire

Every tear... you'll cry

Every day... I'll die

With my blood you can survive

And we live forever... into hell...
