I'm in love with you
And it's crushing my heart
All I want is you
To take me into your arms

When love and death embrace

I love you
And you're crushing my heart
I need you
Please, take me into your arms

When love and death embrace
When love and death embrace
When love and death embrace
When love and death embrace
When love and death embrace
When love and death embrace

Oh, when love and death
When love and death
When love and death embrace
Oh, when love and death embrace
Ohhhh, oh, when love and death embrace
Oh, when love and death embrace
Oh, when love and death embrace
