Verse 1: So impatient tired of waiting time gets shorter
it's frustrating
up at dawn I get the paper off to work now see you later
is this what my life's really all about?

Chorus: I wanna be a better man just tryin' to make it
through
right when I think I've gotten there I find I've got more
work to do
wish I were a much richer man but if you wanna know
the truth
everything I'm lookin' for I've got it all with you

Verse 2: Smiles and laughter late night chatter tears
and joy are things that matter
that's what my life's really all about (Repeat Chorus)

Bride: I feel like I am sinkin' could my life be so bad?
then I take a look around
lately I've been thinking everything I need's right
it's with you look what I have found

Chorus (modulated)
I wanna be a better man just tryin' to make it through
right when I think I've gotten there I find I've got more
work to do
wish I were a richer man but if you wanna know the
truth
everything I'm lookin' for I've got it all with you
yes everything little thing I'm searchin' for I've got it all
I've got it all with you
