Last thing that you said before you left
If I remember right you said
that you didn't have to go
a couple of weeks with the girls in mexico
said the sun would do you good
baby how was i to know
never got the postcard that you promised me baby
couldn't find any time to make no call
haven't seen a single photograph you've taken
did you even go at all

I wanna know exactally what went on
when you were gone
cause i don't understand where you're coming from
I wanna hear the story straight from you
tell me the truth
cause i wanna know
[girl I gotta know what went on]

everything was cool as far as I could tell
and I swear I never had a single doubt untill
I though that I heard your voice on the radio
sending out your love to someone I don't know
(something)
latley you've been acting strange baby
never known you to be this quiet before
when we're alone it's like you're looking right through
me

ain't you feeling this anymore

I wanna know exactally what went on
when you were gone
cause i don't understand where you're coming from
I wanna hear the story straight from you
tell me the truth
cause i wanna know
[girl I gotta know what went on]

baby where you going
[where you going]
I just have to know it

[I just have to know it]
know what's been going on

I wanna know exactally what went on
when you were gone
cause i don't understand where you're coming from
I wanna hear the story straight from you
tell me the truth
cause i wanna know
[wanna know, wanna know, wanna know, wanna know]

I wanna know exactally what went on
when you were gone
cause i don't understand where you're coming from
I wanna hear the story straight from you
tell me the truth
cause i wanna know
[girl I gotta know what went on]

I wanna know exactally what went on.
