I met somebody who knew someone on the internet
He said that everything's fluid and subtle over there
Walking on miles and miles of wire very long
Very long time became a split second now

You say our love is not a public thing
You like what you got, you don't want a scene
Well I can't kill it darling, everybody holds a piece

I've got a schedule to keep
I try to keeping my head
The press are everywhere
With their sneaky little cams
Remember getting up used to take us very long
Very long time since I got up at three PM

You say our love is not a public thing
You like what you got, you don't want a scene
Well I can't kill it darling, everybody holds a piece

You can't choose it
Share or loose it
Every time
Share or loose it
Baby you were never mine

Remember getting up used to take us very long
Very long time since I got up at three PM

I got a thing for you girl
Will you share it
Baby

You say our love is not a public thing
You like what you got, you don't want a scene
Well I can't kill it darling, everybody holds a piece

Well I can't kill it darling
I won't kill it
