You say "everything's changed"  
but growing up was your first mistake  
I can't believe you thought you looked so cool  
and now I see you and it just makes me sad

Where have these substances taken all my friends?  
to rehab, the gutter, the grave  
there's no way to make you understand it man  
they bought and sold you like a slave

Now I'm alone  
you've gone away  
it's not about Straight Edge  
it's about change  
where did you think  
using that stuff has taken you?  
nowhere fast

bet you never thought  
that stuff would take you  
NOWHERE fast
