It makes no sense to me
a room full of wanna-be's
just a cool-contest where nobody wins
shelling out money for that which hurts you
and let's not forget I have to put up with it too

It's a stupid fad that James Dean started
something that your parents do
are you straight up retarded?
take another puff and watch your life vanish
your lungs are gonna give out long before you do

A stupid addiction
your life is in friction
you know what you're doing is wrong too
don't just do what your friends do
your life is up to you
at least I try to live a life free
free of bodily harm
