If you see me walking round in circles  
If you see me staring at the sky  
If you think I still miss you since you left me  
Congratulations, you're absolutely right.

If you think life's been empty since you left me  
If you think that I cry for you at night  
If you think I take you back in a minute  
Congratulations, you're absolutely right.

--- Instrumental ---

If you think that I try to call your number  
If you think I drive by your house at night  
If you think I still love you like I used to  
Congratulations, you're absolutely right.

If you think life's been empty since you left me  
If you think that I cry for you at night  
If you think I take you back in a minute  
Congratulations, you're absolutely right...
