Goodbye, good luck, God bless you  
May you find what you're searching for  
May your guardian angel walk with you  
As you walk away from my door.

Oh, I made my first big mistake, dear  
When I tried to be someone that I can't  
And I can't live a life any longer  
No I just can't be something that I ain't.

Goodbye, good luck, God bless you  
May you find what you're searching for  
May your guardian angel walk with you  
As you walk away from my door.

--- Instrumental ---

Oh, you tried so hard to make me over  
And do something that you were searching for  
And there's no use to go on pretending  
I could never live up to the part.

Goodbye, good luck, God bless you  
May you find what you're searching for  
May your guardian angel walk with you  
As you walk away from my door...
