I took time to think things over - time I didn't want to spare.

Cause someone told me I had things to fix - things I didn't wanna repair.

So I was talked into sitting quietly thinking bout the things I'd done.

Didn't like it so I said wisely oh hell!

Where's my fun?

Hail hail spit n'drool.

I liked the way that things were going don't like the way they're going now.

But I'd like to add there is a thing I can do

gonna tell you what, where and when and how.

Hail hail spit n'drool.
