{Hear this, hear this  
Vick's gonna sing his new crazy record for us, right  
now}

The present has scared away the past  
And there's nothin' left but now and future  
Time is movin' all to fast I tried to grab some but it  
passed  
But that's the way it'll always be for me and you  
Pushin' through and pushin' way to hard  
In front of me a cart filled with future

{Well, well, well}

Time is movin' all to fast I tried to grab some but it  
passed  
But that's the way it'll always be for me and you  
All to young to young to think like this  
Too much time has passed and I can't stand the future  
Time is movin' all to fast I tried to grab some but it  
passed  
But that's the way it'll always be for me and you
