Ugh now you come to us, begging from your heart  
Can't say we need you, but we're ready to forgot  
Life goes on and you still carry burden of trust  
I want you to know  
Live your life, live with your crew

My life, my crew

Ugh I can't believe we trusted you  
Shared everything with you for so long  
You chose to let us down, we chose to take up where  
we left off  
Time goes on and you're still same stupid sucker  
You should've known  
Recognize only one truth, only once you lie

I will never betray, never lose your honor  
I will never forget, never lose your face
