Our time apart has taught me
That we cant be together,
Our time apart has taught me,
That be cant be forever

You told me you'd be there
You told me you cared
And I believed you
All the hurt you left inside.

And now I find,
I don't need you tonight
(I don't need you, I don't need you)
I found a way to make you go away,
(Our time apart has taught me,
That we can't be together,
Our time apart has taught me,
That we can't be forever)
I'll be just fine,
I don't need you tonight,
Tonight I made you go away

I'm sleeping through the nightmare
That you put me through,
I knew you wouldn't understand
What I had to do,

And now I find,
I don't need you tonight
(I don't need you, I don't need you)
I found a way to make you go away,
(Our time apart has taught me,
That we can't be together,
Our time apart has taught me,
That we can't be forever)
I'll be just fine,
I don't need you tonight,
Tonight I made you go away

[Vocoder]

And now I find,

I don't need you tonight
I found a way to make you go away,

I'll be just fine,
I don't need you tonight,
Tonight I made you go away

[Normal vocals]

And now I find,
I don't need you tonight
(I don't need you, I don't need you)
I found a way to make you go away,
(Our time apart has taught me,
That we can't be together,
Our time apart has taught me,
That we can't be forever)
I'll be just fine,
I don't need you tonight,
Tonight I made you go away

And now I find,
I don't need you tonight
(Our time apart has taught me,
That we can't be together,
Our time apart has taught me,
That we can't be forever)
Tonight I made you go away
