(bliss)

Driving home I was miles away  
When I thought that I saw your face  
Late at night, a lightning flash  
Put reality in it's place  
I never saw the warning signs  
'til it was too late

I'm a casualty  
A victim of my own circumstance  
A casualty a hopeless case  
That never stood a chance at all

I never knew what hit me  
Like somebody put out the light  
I was going crazy  
Couldn't tell if it was day or night  
I must have lost direction  
A simple hit and run

Chorus

Out of control on a one way street  
Feeling myself beginning to slide  
Out of my head too blind to see  
That you were there just for the ride

Living this life in tragedy  
Why did this happen to me

Chorus

I never stood a chance  
I'm a casualty x3
