

Buddahead "Outside"

Visit "[Outside](#)" on MotoLyrics.com

Have you ever thought about how nothing lives without
the light?

But you can go blind staring at the sun
Sometimes when I look at you I have to turn away
But I can't bare the darkness when you're gone
And I reach out for you

Don't know where to begin
Always outside looking in
Don't know how to begin

Always outside looking in

Now I only think about how I can't live without the light
I take my chances staring at the sun
If I could only look at you I would never turn away
Because I can't bare the darkness when you're gone
And I'd reach out for you

Don't know where to begin
Always outside looking in
Don't know how to begin
Always outside looking in
