Just in me, trust in me
Crawl inside, there is no time
To entrust my particular situation

Give me a kiss, across my lips
I'll take you from all that's bliss
Rape your eyes to create the possibilities

You are here, it's where you are
Pay no mind, just take the guy
He's about to die from the force of the ability

From the force of the ability
From the force of the ability

Look this way, don't look at all
Always tip, stay on the ball
Ease your mind with the force of your ability

And my particular situation
And my particular situation
And my particular situation
And my particular situation
And my particular situation
