SISTER

he's gone miles high
is he going miles higher?
he's gone miles high

isn't that your sister climbing in the window?
tapping on the glass hoping that you'll open
easy does it easy are you standing down now?
hands under water taking her down in town

he's gone miles high
is he going miles higher?
he's gone miles high

isn't that your mother sleeping somewhere distant?
watching from above counting all your whispers
people pleasing lazy doesn't come around

the only thing he needs is what he just cannot have

he's gone miles high
is he going miles higher?
he's gone miles high

isn't that your sister? (x5)

he's gone miles high
is he going miles higher?
he's gone miles high
