"Help Me"

Visit "[Help Me](#)" on MotoLyrics.com

Tell me how it feels It's like a little too real What you're
going though A little too real Take another day Take
another breath Get a little sad Let it fade away
Everything you conceal Help me heal The way you feel
How it feels Let me see Like a waterfall You know you
can have it all Take my hand Help me help you Help me
help you Help me help you Help me when you're blue
Feel a different sun Make another plan Set another sea
And make it start again Take another look Play a
different game And throw the past away Fly a different
flag Help me heal The way you feel Everthing you
conceal Let me see How it feels Like a waterfall You
know you can have it all Take my hand Help me help
you Help me help you Help me help you Help me when
you're blue Help me help you Help me help you Help
me help you Wouldn't that be cool Help me You will be
free someday The pain will go away You're already on
your way Just leave it in the past You know you can have
it all Take my hand Help me (When you wanna talk
some more) Help me (When you wanna be turned
around) Help you (When you wanna be turned around)
Help you Help me (When you wanna be turned around)
Help me (When you wanna talk some more) Help you
(When you wanna be turned around) Wouldn't that be
cool Help me (When you wanna be turned around) Help
you (When you wanna be turned around) Help me
(When you wanna talk some more) Help you (When you
wanna be turned around) Help you Help me (When you
wanna be turned around)
