1 2, 1 2 3

I'm telling you something

I'm telling you something

Tell me baby

If maybe we could put the top down

The sun is flying so high today

And the shine off your cherry fenders

Would be too much but not too much

With your hand reach out

With your mouth shape the phrase

And say

Just so you know

Just so I know

Just so we know

We're together

If I can look in your eyes

And see what I feel then it's real

And I know

We're together

With your eyes look over

With your car pull over

That's all it's gonna take

'Cause I have been

Paying very close attention to your habits

Somebody over there at the counter

In the diner on the corner in the corner of my mind

Wears your face

On a different day

I am someone else too

And we disappear together

We fold up and fly away

Like paper airplanes

We rub each other's creases

And line up each other's angles

And we choose the brightest papers and we fly

Just so you know

Just so I know

Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together

Just so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together

And we could really take our time
We could really get our shapes just right
And fly off each other into the night
And where we land is out of our hands
And so in this way we don't stop
We never stop
We don't stop
We won't stop baby

Just so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together

Just so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together
