

Holly Valance "Help Me"

Visit "[Help Me](#)" on MotoLyrics.com

Tell me how it feels
What you're going though
It's like a little too real
A little too real
Take another breath
Take another day
Get a little sad
Let it fade away

Help me heal
The way you feel
Everything you conceal
Let me see
How it feels
Like a waterfall
You know you can have it all
Take my hand

Help me help you
Help me help you
Help me help you
Help me when you're blue

Make another plan
Feel a different sun
Set another sea
And make it start again
Take another look
Play a different game
Fly a different flag
And throw the past away

Help me heal
The way you feel
Everthing you conceal
Let me see
How it feels
Like a waterfall
You know you can have it all
Take my hand

Help me help you

Help me help you
Help me help you

Help me when you're blue

Help me help you
Help me help you
Help me help you
Help me
Wouldn't that be cool

You will be free someday
The pain will go away
Just leave it in the past
You're already on your way
You know you can have it all
Take my hand

Help me (When you wanna be turned around)
Help you (When you wanna be turned around)
Help me (When you wanna talk some more)
Help you
Help me (When you wanna be turned around)
Help you (When you wanna be turned around)
Help me (When you wanna talk some more)
Wouldn't that be cool

Help me (When you wanna be turned around)
Help you (When you wanna be turned around)
Help me (When you wanna talk some more)
Help you
Help me (When you wanna be turned around)
Help you (When you wanna be turned around)
