I see clearly I'm on the outside
I've been watching you fall from the start
I can't believe it how'd you get here
I remember you when you we're smart
It's not that you've lost all that now
But blind is the love that leaves no room for doubt

[Chorus:]

And he's making a fool out of you
He's making a fool out of you
He's making a fool out of you
But you're still smiling

Have you forgotten all that you taught me
Never lay down your heart for a lie
It's gonna hurt you your eyes open
And you she'd all those tears you've denied
But everyone needs someone else
But love only grows when you don't lose yourself

[Chorus:]

And he's making a fool out of you
He's making a fool out of you
He's making a fool out of you
But you're still smiling
You're still smiling

So have you forgotten all that you taught me
Never lay down your heart for a lie
