To Many Tears

Don't know what lead up to this  
I don't have a clue  
How did things get tangled up  
I never meant to hurt you

You should have been there for me baby  
standing right by my side  
now things have changed and I've got to go  
to many tears have been cried

to many tears, to many tears oh I've cried in vain, I've  
cried in vain  
ooh to many tears, to many tears oh they drown just  
like rain oh to many tears

I've tried to be strong  
I've tried to do you right  
but you left me all alone  
one to many nights  
chorus

when I needed you the most  
emptiness was all I got  
I'm not gonna cry no more  
I've shed my last teardrop

Lead

Everything is gonna be ok baby  
both of us will survive  
lets be thankful for the love we shared  
and not for those tears that we cried

Chorus x2

lead and out
