[Queiroz/Carlo]

I want to know what is behind your lonely soul  
To understand all of the secrets of your life  
Forbidden dreams lived only inside my head  
But time has come to say 'is now or never'  
Open up your eyes

[Brigde:]

Darkened skies above us turn the days into the long  
nights

Crashing my lonely heart, you came into my life  
Walking around, to nowhere, every night I search for  
someone

But I will search forever, can you realize?  
I still don't know what is behind your lonely soul  
But time has come to say 'is now or never'  
Don't tell me another lie

[Bridge:]

Darkened skies above us turn the days into the long  
nights

Crashing my lonely heart, you came into my life  
Walking around, to nowhere, every night I search for  
someone

But I will search forever, can you realize?

[Chorus:]

We can make it happen ,and we can change the story  
When we find the reasons no one will turn us apart  
With some courage and feelling we'll break all the walls  
And this feelling is growing stronger  
Conqueting all around.
