Before the lights go out
We started to feel indifferent
Our bodies shake,
We chose this fate,
And our lives are in danger.
We'll never have enough
We're making a bad impression
As you turn pale I watched you turn fail
And fall under pressure.
So hold my hand and come a little closer
We'll brake up lines and soon it will be over

If you find a part
don't ever let go and stop believing,
If you find a part just tilt your head back
to stop the bleeding [x2]

Dying to come down
We're tired of being restless
As we inhale
That nothings ourselves
And that nothing can stop us
So hold my hand and come a little closer
We'll brake up lines and soon it will be over

If you find a part
Don't ever let go and stop believing,
If you find a part just tilt your head back
To stop the bleeding [x2]

Oh oh we were never meant
Oh oh we were never meant
Oh oh we were never meant
To live this way

If you find a part
Don't ever let go and stop believing,
If you find a part just tilt your head back
To stop the bleeding [x2]
