I don't want this anymore if being with you turns out like
before
Waiting for you to make up your mind while i burn
inside
Answer me, do you want to be with or without me?
I don't want to be the one to change your mind if you
don't care
You know what you've done is wrong
You can't keep leading me on
Waiting for you, there's a lesson to be learned
Now it's your turn.
Answer me, do you want to be with or without me?
I don't want to be the one to change your mind if you
don't care

Because I still care
