Maximum protection, massive observation  
While questions marks get rejected, orders are  
imposed  
The eye custodes us all, protects us from delusion  
The delusion of liberty under the watchfull eye

Under massive observation  
Internal symbolic models collide  
Functional fixity  
Replaces spontaneous thought

A subjective depiction of our reality?  
...Or "their" objective depiction?  
In a time of fragile balances and unbalanced power  
One finds it difficult to distinguish reality from  
Reflection and truth from impression or which  
Side of the mirror they are looking at...

Walkers on a path uncertain  
In a world of prowlers being the prey  
Living what seems to be full lives  
Lives full of doubt

The will to will, evaporates  
As will becomes the will  
Of a universal step brother  
In the tender hug  
Of the false "democracy"

Daughter of tyrrant and of deceit

Sister to subjection  
Sworn enemy of ( individual ) liberty  
One be the argument of....  
"Absolute protection"

Cleanse the tyrrant expose deceit

Under the watchful eye
