(R.J. Johnson/The Honeyrods)

You made us all feel safe at night
when you bombed the soviet missile site
A million cannons couldn't keep you away
got off in the black Porsche and you sped away
But you can't love us all
if you're already gone
But you can't love us all
if you're already gone
But you can't love us all if you're already gone
But you can
you can
you can
Take a chance
take a chance
put your life in your hands
But you can't believe in luck
cause you're already dead
take a chance
come on
put you life in your hands
But you can't believe in luck
cause you're already dead
You made us all feel safe and alarm
get us out of the way, from the weight of the harm
Drove off with a funky diva
It didn't matter cause they didn't see ya
you made us all feel safe and alarm
