I put my spacesuit on
Count back ten to one
The gravitation pull gets stronger
My skin it pulls away
My brains are on a plate
The weightless feeling here is bliss

This is the best thing that has ever happened to me
These are the colours that I've always wanted to see
And although I've never said it before
I love you, I need you, I mean it, I love you

Now I'm embracing you
Watch and admire the view
Through telescopes, our friends they watch us
These heights are dangerous
From here I can see why
Our astronauts retire early

This is the best thing that has ever happened to me
These are the colours that I've always wanted to see
And although I've never said it before
I love you, I need you, I mean it, I love you

This is the best thing that has ever happened to me
These are the colours that I've always wanted to see
And although I've never said it before
I love you, I need you, I mean it, I love you
I need you

This is the best thing that has ever happened to me
This is the best thing
These are the colours that I've always wanted to see
This is the best thing
And although I've never said it before
I love you, I need you, I mean it, I love you
