"Always A Place"

Visit "[Always A Place](#)" on MotoLyrics.com

There's always a place
Some say that it's heaven
Where someday we'll find
Some kind of escape

But one thing I know
We'll find it together
As long as you're there
There's always a place

A faraway land
A desert oasis
An island of sun
And a forest of rain

Don't need to look far
Just into your smile
As long as you're there
There's always a place

And if there's always a place we can run to
There's always a place we belong
And if there's always a dream, it can only come true
As long as we keep holding on

There's always a place
(Always)
There's always a place
(Always)
Yeah

There's always a place
When I am way beyond lonely
With nothing to hide
And nothing to prove

There's always a space
That's there for me only
I know deep inside
The place is with you

There's never a time

To question our feelings
There's hardly a word
That seems out of place

We'll find our way home
We find it together
As long as you're there
There's always a place

And if there's always a place we can run to
There's always a place we belong
And if there's always a dream, it can only come true
As long as we keep holding on

There's always a place
(Always)

Ooh and if there's always a place we can run to
(Always)
There's always a place we belong
And if there's always a dream, it can only come true
As long as we keep holding on

There's always a place
(Always)
There's always a place
(Always)

There's always a place
(Always)
That's good
