And this will be the very first time  
That I'll see myself in the eyes of my enemy  
And now I see my weakness  
I'm trapped inside this parallel of mine and I'm trying to  
hide But I know somebody's watching me  
And now I see my weakness  
Be that it may I still walk around with my head held high

You brought me down  
Now I'm free

How could you ever make it up to me  
And this will be the very last time that I'll break my back  
Just to show you what's inside of me  
And now I see my weakness  
I'm trapped inside this parallel of mine and I'm trying to  
hide  
But I know somebody's watching me  
And now I see my weakness

You brought me down  
Now I'm free

How could you ever make it up to me
