I get so lost in your eyes
I wish that i could live here for a thousand lives
And your heart feels so wide
I just want you to get close so i can crawl inside

Cause no one love me love me love me like ya do
You know i love ya love ya love ya too
Your still standin in my corner if i lose
Cause no one love me love me love me like ya do

And i'd drive all night
Just to lay beside you in the moonlight
Cause your arms feel so right
Nothings gonna hurt me when you hold me tight

Cause no one love me love me love me like ya do
You know i love ya love ya love ya too
Your still standin in my corner if i lose
Cause no one love me love me love me like ya do

Leaving in the morning seems to soon
But i still feel your kisses in afternoon
And i can still hear you wispher in a crowded room
I know you can here me to

Cause no one love me love me love me like ya do
You know i love ya love ya love ya too
Your still standin in my corner if i lose
Cause no one love me love me love me like ya do

No one love me love me love me like ya do
You know i love ya love ya love ya too
Your still standin in my corner if i lose
Cause no one love me love me love me like ya do
