Diese Fortschritte! Dieses Eindringen von  
Wissensstrahlen  
von allen Seiten ins erwachende Hirn! Ich leugne nicht:  
es beglückte  
mich. Ich gestehe aber auch ein: ich überschätzte es  
nicht, schon  
damals nicht, wieviel weniger heute...  
F.Kafka

Rays of knowledge  
from everywhere inside my brain  
used to make me happy  
in the end it's only pain

A pure white sheet of knowledge  
so much to see and to know  
the strong will for the progress

the will to see the will to go  
the light of knowledge seemed so brightly  
hoped that it would never blind me

Rays...

Oh my sweet delight of knowledge  
Please enlighten me  
So please enlighten me

Rays...

Used to love the new sentence  
became addicted to the science  
oh sweet delight of cognition  
turned to a longing for hell  
love is not the reason anymore  
it's just the thrill of possibility
