"Living In Danger"

Visit "[Living In Danger](#)" on MotoLyrics.com

Each and every day we clearly see the signs
The world we live in is falling apart
Violence and destruction, drugs, pollution and leaders'
lies
Even love has become deadly

We're living in danger
Threats everywhere
Let's show reaction
Soon it will be too late

Unconsciousness, selfishness or just stupidity
Everybody's guilty of something
If we'd all become aware of our responsibility
Things could only get better

We're living in danger
Threats everywhere
Let's show reaction
Soon it will be too late

We're living in danger
Threats everywhere
Let's show reaction
Soon it will be too late
