et me out and
Let me breathe
Just give me space
And set me free

These words, they
Fly like bullet from a gun
The smoke, it clears
And look at what we've done

Oooh
And wait,
I've got something left to say

Can we take back
All the tears that we've cried
And take back
Every year that's gone by
Create a life of memories
And a love that grows
In a world with no time
That's a world we'll never find

A flower blooms
I watch it die
The sun, it sets
I watch it rise again

A guilty conscience
Leaves a warming heart
With every day
We seem to drift a part

Oooh
And wait,
Please take me to a place

Where we can take back
All the tears that we've cried
And take back
Every year that's gone by
Create a life of memories
And a love that grows
In a world with no time
That's a world we'll never find

Can we take back
All the tears that we've cried
Can we take back
Every year that's gone by
Create a life of memories
And a love that grows
In a world with no time
Yeah

Can we take back
All the tears that we've cried
And take back
Every year that's gone by
Create a life of memories
And a love that grows
In a world with no time
That's a world we'll never find
