Hot Chocolate - A Simple Line

Is anybody listening our ears deceive  
How easily do we believe the hype machine?  
The label means everything it's all for show  
I wanna hear the awful screams  
Everything contrived and laughable  
This phase will surely die just close your eyes

Listen with ears not your eyes such a simple line  
Try to escape from the heart, the freedom you will find  
Listen with ears not your eyes let the music play  
Truth throughout all your life

An audible tragedy upon our sleeves  
Becoming a dying breed, we're obsolete  
What happened to the melody?  
There is no bar so easy to imitate, perfectly  
Cuz thinking is much too hard  
This phase will surely die just close your eyes

Listen with ears not your eyes such a simple line  
Try to escape from the heart, the freedom you will find  
Listen with ears not your eyes let the music play  
Truth throughout all your life

What goes up most come down to take the fall  
Gravity will decide who stays or goes  
When the crowds realize that they've been wrong

Listen with ears not your eyes such a simple line  
Try to escape from the heart, the freedom you will find  
Listen with ears not your eyes let the music play  
Truth throughout all your life
