I'm so lonesome I feel sad

Talk to me and don't get mad

I don't know  
where to begin  
Start right now and you will win.  
Ev'rybody needs a person

A good fellowman  
Who tries to understand.  
Don't ignore approaches of him  
When he's reaching out his helping hand.  
Fire in the night  
keep it burning bright.  
Fire in the night  
keep it shining wide.  
So keep it burning bright  
so keep it shining wid  
When you need help don't despair  
Friends are 'round you ev'rywhere.  
Don't overlook the secret signs

See the bridges with their lights.  
I hope you are recognizing all the watchful eyes  
That are around you here  
Ev'ry little flame that's waiting  
To warm up your loneliness and kill your fear.  
Fire in the night  
...  
Fire in the night  
...
