"Leave It To Me"

Visit "[Leave It To Me](#)" on MotoLyrics.com

Now this one goes out to my lady
I want me and you to go on this wonderful love
rendezvous, baby
One on one, give you a little love escapade
You know what I'm saying?
Mr. Lover

Candlelight, dinner for two
Just me and you under the moon
Sailing on a summer night cruise
I mean to rock your whole world baby
I'm da man allowed to drive you crazy

Set the motion to the ocean
'Cause some commotion
Girl surrender to my love potion
I'll hit you off now with some hot oil lotion
I play it safe so let me break out my Trojan

Leave it to me, baby
We can turn on the heat, baby
And wrinkle the sheets, baby
Whatever you need, baby

Leave it to me, baby
We can turn on the heat, baby
And wrinkle the sheets, baby
Whatever you need, baby

Now let me find a day real fine
Hot tub, jacuzzi, caviar with some white wine
That's right, I'm livin' livin' in style
Mansion in the hills and not another house for miles

Come let me take you and show off my pet reptile
In two days gonna feed it to my rottwiler
No interruptions today
Leave it to me and have things my way

Leave it to me, baby
We can turn on the heat, baby
And wrinkle the sheets, baby

Whatever you need, baby

Leave it to me, baby
We can turn on the heat, baby
And wrinkle the sheets, baby
Whatever you need, baby

'Cause I like the way you do the things you do
I wanna make sweet love to you
'Cause I like the way you do the things you do
I wanna make sweet love to you

I wanna send chills up your spine
And let you feel good inside
And explode just like a land mine
I'm here to cunt and thrill and that's my mission
Love making with timing and precision

My skills is kickin' like breakin'
Proper lovin', leave you hummin'
Sweet melodies of future come
Prepare to get soaked in sweat, girl, yeah
'Cause you ain't seen nothin' yet

Leave it to me, baby
We can turn on the heat, baby
And wrinkle the sheets, baby
Whatever you need, baby

Leave it to me, baby
We can turn on the heat, baby
And wrinkle the sheets, baby
Whatever you need, baby
