words of war don't mean shit if the war's for nothing i'll
wait for now so show me how this all works cause all
these things just seem empty and that's what hurts so i
can't help but to question what was real or what was
concealed did you need to abandon and change face if
you started today - would you miss it cause we've been
blind i don't want to believe that the truth is lost so
easily was it a mistake taken the wrong way through
our worst days or did loyalty not mean a goddamn
thing in the ending if you started today - would you
miss it cause we've been blind and i don't want to
believe that the truth is lost so easily so i can't help but
to question what was real or what was concealed
though trial and error did take place did you need to
change face and abandon what was is real or what we
felt pulled heavy weight what grounded us what
astounded me was it all for nothing
