

Hot Water Music "Difference Engine"

Visit "[Difference Engine](#)" on MotoLyrics.com

Proceed to find my eyes so i can recognize
A will of strength
A will of truth and solemn meaning
Pocket shaved eye if i could show
That i could hold up my head up high
You would that this moves me
(this sparks me)
So i will show that i can hold my head up high
So we can get moving this engine's burning on
Come time when it's you and i
And all that's left is our pride face to face
And in our faces is the distinction this engine's burning
on
And my friends to take me back where we begin
Through evolution and to where we end
So educate slowly to forget
Where do you link it how do you link it
