We're still alive  
He said we met 11 years before or more  
And i remember way back  
When he taught me my first bar chord  
We used to tear it up reckless  
Moonpies for misfits with no cares  
You got that right  
I said we're still here scarred but here  
But then again we were invincible  
Then we're still here just not like then without a care  
Full of hate when we smashed for laughs  
And to prove to all fuckers we would quit school  
Stuck ink and called the working man  
And the men who worked fools to hit bottom and to  
crash  
We thought the last sight of us was the last sign of us  
We thought the last sight of us was the last sign of us  
We thought wrong because face to face here we stand  
strong  
But this time we stand for good
