There's a way you had,
About your life,
That touched the hearts
Of everyone.
Now you're gone and we'll move on,
To carry the love we shared.

And I'm not so sure
They understood
Just what you gave
And what you paid.
Too much to realize
Or know the difference that it made.

[Chorus]

No one could ever say that things
Would all turn out this way
No one could ever know the road
That led you where you are today

Countless words are left on shelves,

Intended for no-one but you.
I'm taxing my mind with the time inbetween
That gets spent carelessly.
We can't get it back
Just like you
It has fallen through,
Fallen through the cracks.

[Chorus]

No one could ever say that things
Would all turn out this way

No one could ever say that things
Would all turn out this way

No one could ever know the road
That led you where you are today
