

## Hourcast "Lunar"

Visit "[Lunar](#)" on MotoLyrics.com

I don't need your air to breathe  
Its suffocating me  
Bounded by your gravity  
Its pulling down on me  
Will you set me free from you  
Or will you make me stay  
And I fear I breathe this much  
Was I dying away  
I don't need your air to breathe  
I don't need your air to breathe  
And I would rather live on the moon  
And stay here without you  
And I'll be so far away  
And I just wanna live on the moon  
Cuz it's better without you  
And I'll just go far away  
I can't see the stars above  
Through your polluted skies  
Then walk from sun above

I shiver in your eyes  
And as you kill yourselves you can look up into the  
night  
And see me waving back at you where everything's  
alright  
And I would rather live on the moon  
And stay here without you  
And I'll be so far away  
And I just wanna live on the moon  
Cuz it's better without you  
And I'll just go far away  
And I would rather live on the moon  
And stay here without you  
And I'll be so far away  
And I just wanna live on the moon  
Cuz it's better without you  
And I'll just go far away  
Go far away  
Go far away.
