Julia
Freedom comes and it waits for no one
Julia
For this night you were born
Live your life
Inside you your deepest passions move
They tell you "all the time you walked you walked away
the truth was at your fingertips"
Say it now or say it never
All you senses sing together
Julia we're hoping for you
May all good things adorn you
Every star is in it's place
They pour forth speech and whisper graces
Julia, julia
Inside you your deepest passions move
They tell you "all the time you walked you walked away
the truth was at your fingertips"
Inside you your deepest passions move
They tell you "all the time you walked you walked away
the truth was at your fingertips"
Inside you your deepest passions move
They tell you "all the time you walked you walked away
the truth was at your fingertips"
Every night when the sun dies you can feel it
You're so separated
Songs of love sung from on high
You can hear them
If you concentrated on the time you walked away from
love
