We can fly from here - Part I

(Geoff Downes / Trevor Horn)

Along the edge of this airfield  
The old prop-shaft airliners stand  
Altimeters reading zero  
Formless memories lingering

Nights are cold on this airfield  
I sit alone and watch the radar  
Locked on your wavelength  
Caught in the field, falling slowly

And we can fly from here  
And we can fly from here  
And we can fly from here  
Always understanding that we can fly

Along the edge of this airfield  
The old prop-shaft airliners stand  
Altimeters reading zero  
Formless memories lingering

And we can fly from here  
And we can fly from here  
And we can fly from here  
And we can fly from here

And we can fly from here  
And we can fly from here  
And we can fly from here  
Always understanding
