Slaughter your will  
There is no room for thinking  
Go on into the almighty void  
Surrender your being

They can't protect you from your own head  
You'll hear the angels sing songs of the dead

The nightmare you chose  
The nightmare you chose is here

Into the abyss  
Spend your last moments dreaming  
You'll soon be at peace with your dead-end years  
The vultures are circling

They can't protect you from your own head  
You'll hear the angels sing songs of the dead

The nightmare you chose  
The nightmare you chose is here

Flatline your soul  
Flatline your soul

The nightmare is here
