in english :

I don't know when it all started
When my head became dizzy with thoughts of you
These thoughts would often pop up in my mind
I feel anxious as my heart expands towards you

It's nothing.. it's just a little thing
Your words are awkward to me

Is it love? If you feel the same way, is it a beginning?
My heart keeps saying it loves you
It screams out for the whole world to hear
Why has it taken so long for me to hear it~?
We've finally met.. finally found love
